

NEW GRADUATE PROGRAM

KICKSTART YOUR VETERINARY CAREER

The Apiam family recognises that the transition to practice can be a challenging time for graduates. Our structured New Graduate Program identifies the key areas of professional development from a clinical and pastoral perspective to ensure that our graduates feel supported whilst being given the freedom to learn.

PROGRAM FORMAT:

- 24 month program, suitable for newly or recently qualified veterinarians.
- On-line and face-to-face training incorporating emotional intelligence, stress management, communication skills and leadership.
- An individually assigned Mentor to oversee clinical and non-clinical development.
- Recording and monitoring of clinical skills to allow goals to be set and achieved.
- Practical and targeted Continuing Education workshops to allow graduates to fast-track in valuable clinical skills across a range of species.

We are looking for motivated and conscientious new graduates to work with us in our clinics.
